

Call-In Dictation Service

DigiCloud is our Call-In Dictation Service. Its secure and always ready to record your dictation and deliver it to your transcriptionist without delay. It's a better alternative to expensive handheld recorders and insecure dictation apps, and it's the perfect backup for your DigiTel Call-In Dictation System.

1. Call us at 1-631-828-1245 to start your membership. We will enroll your users and send you a list of their DigiCloud log-in PINs and Passwords.
2. Each user will call DigiCloud at 1-631-828-2034, log-in with their PIN and Password, and will be prompted to begin recording. They can record, pause, play back and mark their dictation a priority using the touchtones on their phone, and they can enter a Work-Type and Reference Number that will be tagged to each file for your transcriptionist to see. When they're finished dictating they can send it for transcription and begin a new one, or they can simply hang up to send it for transcription. Your transcriptionist will receive an email or text to alert her to your new dictation.
3. Each user's DigiCloud dictations are securely delivered to your transcriptionist's DigiScribe transcription software so they can transcribe them without delay, using foot pedal control to play, pause, rewind and fast forward.

DigiCloud Annual Membership:

DC-1 1 User \$89 per year.
DC-10 10 Users \$128 per year.
DC-25 25 Users \$168 per year.

Upgrade your membership anytime.

DigiCloud Usage Fee:

33¢ per minute of recording time.

DigiScribe Transcription Kit \$189.

Your transcriptionist can work at your office or remotely... anywhere she has Internet access.

If your transcriptionist has a model IN-USB2 or IN-USB1 foot pedal and a headset, a \$75 DigiScribe software license is all she'll need.

Foot pedals and headsets are also available separately if you need a spare.

“DigiCloud is helping create documents efficiently in law firms, police departments, doctor’s offices, hospitals, clinics, insurance companies and universities.”
